

Power Indicator
Once the BOOST power bank is active the power button will turn blue.

Charge Light Indicator
When the BOOST power bank is on the stack and charging the colour indicates the current status.

RED - Charging / BLUE - Fully Charged

SMART WIRELESS INDUCTIVE CHARGING

NEW STANDARD TO HIT THE HOSPITALITY INDUSTRY

It is the innovative portable mobile phone charger designed exclusively for the service sectors. With simultaneous charging technology BOOST allows the charging service to maintain a high standard and efficiency.

INNOVATIVE WAY TO CONNECT

- The charging base automatically recognizes the total current required for the discs
- Each disc has a power management IC and MCU to control the input current automatically
- If the disc needs power, it will allow full input for maximum recharge efficiency
- If the charger is full, it will trickle charge to ensure the disc is full while under self-consumption on the stack
- Top and bottom banks charge equally

Micro USB Cable
The micro cable allows the BOOST power bank to charge your products on the go.

Apple Lighting Cable
The lighting cable allows the BOOST power bank to charge Apple Products on the go.

HOW IT WORKS

1. Charge the BOOST charging disc's, when not in use.
2. Hand out the charging disc; record disc number on docket
3. Your customers can enjoy charging their devices without being restricted to a power point
4. When the customer returns the charging disc place that disc on the bottom of the pile then the next disc is ready to go
